

SPRING 2017

SAFETY IMPROVEMENTS COMING TO OUTER POWELL!

The Outer Powell Transportation Safety Project

SE Powell Boulevard serves many people in many different ways. It's used by trucks, buses, cars and people bicycling and walking. Plus, it's the road that takes a lot of people to their neighborhoods and homes. The Oregon Department of Transportation (ODOT) is making safety improvements between SE 122nd and SE 136th Avenues. This project includes adding:

- Sidewalks where there are none now
- Improved crosswalks so people can cross the road safely
- New curb separated bicycle lanes
- Center turn lanes for cars, buses and trucks for safer turns and to reduce back-ups
- Storm drains to prevent water from pooling on the road

WHAT ABOUT OTHER SECTIONS OF OUTER POWELL?

Design and construction for other Outer Powell improvements will depend on additional funding. ODOT is dedicated to pursuing more funding to make these kinds of safety improvements to other sections of Outer Powell.

How will this project affect me?

When finished, this project will help people get around outer SE Powell more safely. During construction, there will be temporary inconveniences like traffic delays, noise and detours.

The project is currently in the final design stage. ODOT team members are working to complete construction details. Construction is anticipated to start in 2019.

In some cases, changes are anticipated for residential and business driveways on SE Powell and side streets that directly connect to SE Powell within the project area.
